

# RIDMI POORNIMA EPA

## Student

I'm a second year student at IIT. My academic journey has sparked my interest in web development, allowing me to work on various projects.

A passionate learner of new coding languages, solving complex problems, and keeping updated about the current trends in technology.

With a strong foundation in both HTML5 and CSS3, I focus on building responsive dynamic websites.

Always keen to improve my skills and further innovations in web development.

## Education

### ● Bachelor of Computer Science

University of westminster  
Under graduate  
IIT Sri Lanka  
2024-2028

### ● High School

C.W.W.Kannangara M.V.  
2006-2020  
Complete my A/Ls and O/Ls

## Skills

web development

Communication

Java

Html & Css

Python

## Projects

### ● Java calculate System

Jan 2024 - July 2024

Created a calculation system that automates complex mathematical operations for business analytics. This project improved my Java programming skills and reinforced my knowledge in algorithms and data processing.

### ● Personal Finance Traker - Python

Jan 2024-march 204

Developed a personal finance tracking application to help users budget, track expenses, and visualize their spending habits. This project deepened my understanding of data structures and Python libraries with respect to user-friendly interfaces and real-time data update aspects.

### ● University Management System-Java

May2024- July2024

Developed a comprehensive management system for handling various university administrative functions, including student registration, course management, and grading. This project honed my skills in Java and Object-Oriented Programming, enabling efficient data handling and reporting.

## Language

Sinhala

English

## Interests

- Exploring new coding languages and frameworks
- Staying updated on tech trends and advancements
- Contributing to open-source projects
